University location on Google maps, search for "kmutnb".

Nearest MRT stop is Bang-Sue.

Presentation overview

The extent to which professional ethics and standards are implemented is one possible criteria that defines how developed a country is. If Thailand is to move forward with its development goals, joining the ranks of internationally acknowledged fully developed nations, does it need to first raise its professional ethics and standards?

This talk will cover some professional ethics and standards concepts, and relate those concepts to both the Engineering and Political Professions as examples.

Program schedule

09:30-09:50 Registration.
