#### **Exhibition**

The exhibition is held on the fifth floor of the conference venue. Exhibition booths of leading companies in the energy and environmental industries wait for your visit.

# Location: Yokohama

Yokohama is Japan's second largest city, located less than half an hour south of Tokyo by train. Yokohama is known for its international atmosphere, based on its unique history as Japan's first "treaty port." Yokohama's port was one of the first to be opened to foreign trade in 1859. Consequently, Yokohama quickly grew into one of Japan's major cities. Until today. Yokohama remains popular among expats, has one of the world's largest chinatowns and preserves some former Western residences

### Venue: PACIFICO Yokohama Conference Center

PACIFICO Yokohama, a world-class convention complex is located on the waterfront of "Minato Mirai 21", a futuristic town in Yokohama.

# **International Conference** on Power Engineering

## Nov. 30th - Dec. 4th 2015, Yokohama, Japan PACIFICO Yokohama Conference Center

Organized and Sponsored by The Japan Society of Mechanical Engineers

Co-organized by The Chinese Society of Power Engineering The American Society of Mechanical Engineers

Supported by City of Yokohama Yokohama Convention & Visitors Bureau Embassy of the Kingdom of the Netherlands in Tokyo

# Aims and Scope

**ICOPE** (International Conference on Power Engineering) is an international conference targeting a vast area of power and energy systems studies with the exception of nuclear power generation. The conference is drawing interest as an ideal place to present on a variety of studies such as developments of industrial technologies, researches on measuring methods and evaluation tools, and feasibility studies.

The Conference aims to provide a platform for promoting collaborations among professional societies and enhancing technical exchanges in the power engineering community. The Conference will include technical sessions, special lectures, social activities, and exhibition.

# **Topics**

ICOPE-15 will cover both fundamental and applied topics in power engineering including:

- 1. Power Generation Systems
- 2. Distributed Energy Systems
- 3. Fuel Production and Utilization
- 4. Advanced Combustion Technology
- 5. Boilers
- 6. Steam Turbines
- 7 Gas Turbines
- 8. Generators
- 9. Components, Equipment and Auxiliaries
- 10. Operations and Maintenance
- 11. New Materials for Energy Systems
- 12. Environmental Protection
- 13. Renewable Energy
- 14. Energy Storage and Load Leveling
- 15. Heat Pump Systems
- 16. Hydrogen and Fuel Cells
- 17. Economic and Environmental Aspect
- 18. Safety and Security
- 19. Experimental and Measuring Technique
- 20. Electric Vehicle (EV)
- 21. Smart City
- 22. Energy in Europe
- 23. High-Efficiency Power Generation
- 24. Thermal Hydraulics & CFD
